

BBP Water Corporation completes major upgrades to the water system in 2023.

We upgraded 2.4 miles of a 3" and 4" water main along SR 46 East of Spencer that was over 40 years old and undersized due to growth. The new line is a 12" ductile Iron concrete lined pipe that is expected to meet our needs for 75-100 years. The projected cost was \$1.4 Million to complete.

We installed two new water lines in the Town of Spencer, the first was a new 12" line on West street, from Cooper to Franklin streets. The second was an 8" behind Wendy's these new water mains were installed to improve water quality in the town of Spencer, with the new lines we also improved water capacities for fire fighting throughout the town of Spencer and improved water flow from the water plant to the large water tower behind the high school.

We also completed a major upgrade to our West side water booster system. This takes water and boosts it by 85 psi to push the water throughout the entire system west of the OV high school. Upgrades included new electrical and new high efficient booster pumps, we also added a third pump for redundancy, in the next few months a generator will be installed at the booster station.

Many other water system upgrades were completed including over 8 miles of new water mains installed.

West Booster Pump Station, new high efficiency pumps and new electrical VFD's installed in 2023

We are proud to report that the water quality provided by BBP Water Corporation has met or exceeded the water quality standards established at the State and Federal levels.

Easement Clearing and Maintenance

In 2024 BBP Water Corporation will be finishing water service to the SR 67 south corridor, and completing the SR 246 Patricksburg to SR 46 Vandalia Loop.

We will be starting a 15-year planned water meter and service line replacement throughout the town of Spencer. This will replace the smaller 1/2" meters and services lines in town with 3/4" meters and service lines. This project is designed to replace aging infrastructure throughout the town of Spencer.

We have started easement clearing, we will be clearing back trees that are over the water lines, if you wish to clear your own property we can locate the water main and easement for you.
