

Drinking Water Notice –*No Detections*  
Unregulated Contaminant Monitoring Rule (UCMR)  
Reporting Requirement for BBP Water Corporation

Large and small public water systems (PWSs) subject to UCMR 5 (i.e., community water systems (CWSs) and non-transient non-community-water systems (NTNCWSs) are required to notify customers about their UCMR 5 results.

BBP Water Corporation collected samples under the U.S. EPA Unregulated Contaminants Monitoring Rule (UCMR) for 29 PFAS Compounds and Lithium. This monitoring is conducted in compliance with reporting of the data requirements to determine what, if any additional compounds may need to be regulated in drinking water in the future. We collected samples in May of 2023 and did not have any detections in our finished drinking water. If you would like to review the results, contact: BBP Water Corporation office at 812-829-2283 or Email [Info@bbpwatercorp.com](mailto:Info@bbpwatercorp.com)

As a Public Water System (PWS), we are required to notify our customers that the UCMR results are available (40 CFR 141.207) no later than 12 months after they are known. If results are available in time, they may be delivered via the CCR to all billing customers each year by July 1, (40 CFR 141.204[d]).

For more information, please contact the public water system.
